

SkuVault

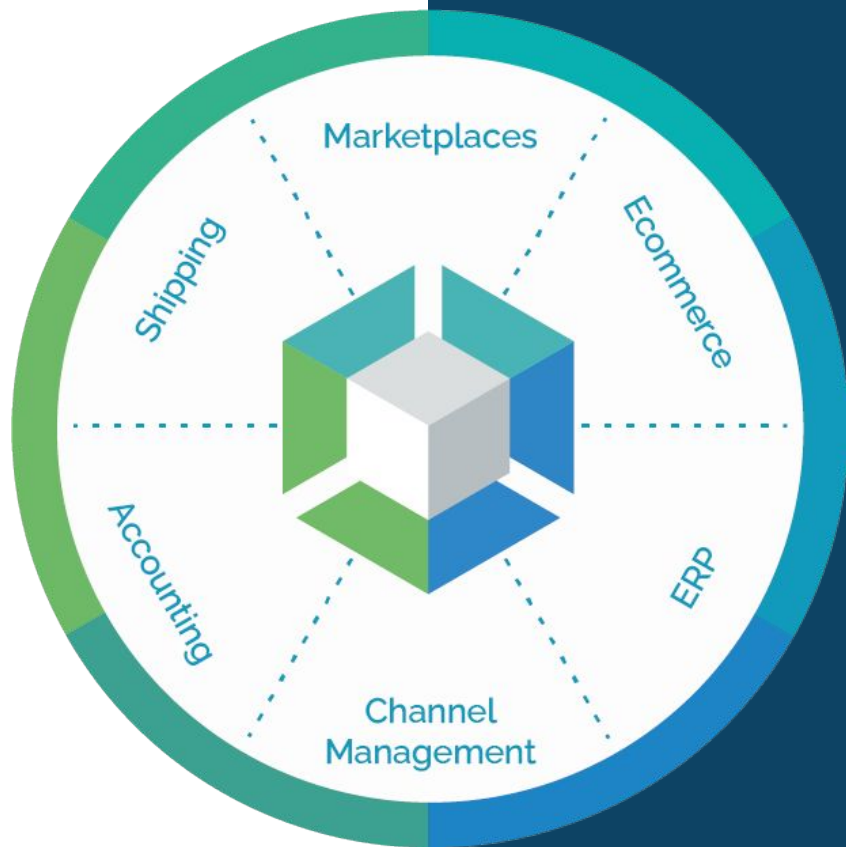

Overview

2021

What is SkuVault?

We solve the most difficult challenge in omnichannel & eCommerce fulfillment: **managing and tracking inventory at scale.**

Growth Starts with Trust

SkuVault helps over 1,000 retailers build crowds of happy customers who review, recommend, and re-buy from their business.

To build trust, retailers must:

- Maintain stock of their best-selling, most-loved products
- Pick and Pack the right product every time
- Ensure only fresh, safe products reach the customer
- Deliver on-time, every time

Our Client Base

39 Industries Served

including Apparel, 3PL,
Health & Beauty, Firearms,
Home Goods

6,400+ Users

Flexibility to add or
remove users as your
company grows

83%

Fewer Mis-Ships

30%

Lower Labor Costs

Fanatical About Our Clients' Growth

22%

The average SkuVault client grew orders volume by 22% last year.

Quality Control

Get the right item, to the right customer, every time.

- ✔ Ensure buyers get the freshest, safest items with lotting & expiry
- ✔ Reduce mis-picks with bin, lot, or serial number scanning built-in
- ✔ Multiple quality control methods to fit your business, process, or space
- ✔ Get deep visibility into product movement with Quality Control and transaction reports

Pick + Pack

Scale your operation, not your staff.

- Pick + Pack faster without commensurate increases in staff
- Simplify shipping by integrating with multiple shipping platforms
- Use labor more efficiently and save time with Wave and Hyper picking
- Barcode Scanning provides faster picking with fewer picking errors & mis-ships. (Quality Control)

Intelligent Inventory and Warehouse Management

SkuVault has the tools to provide deep transparency into your warehouse.

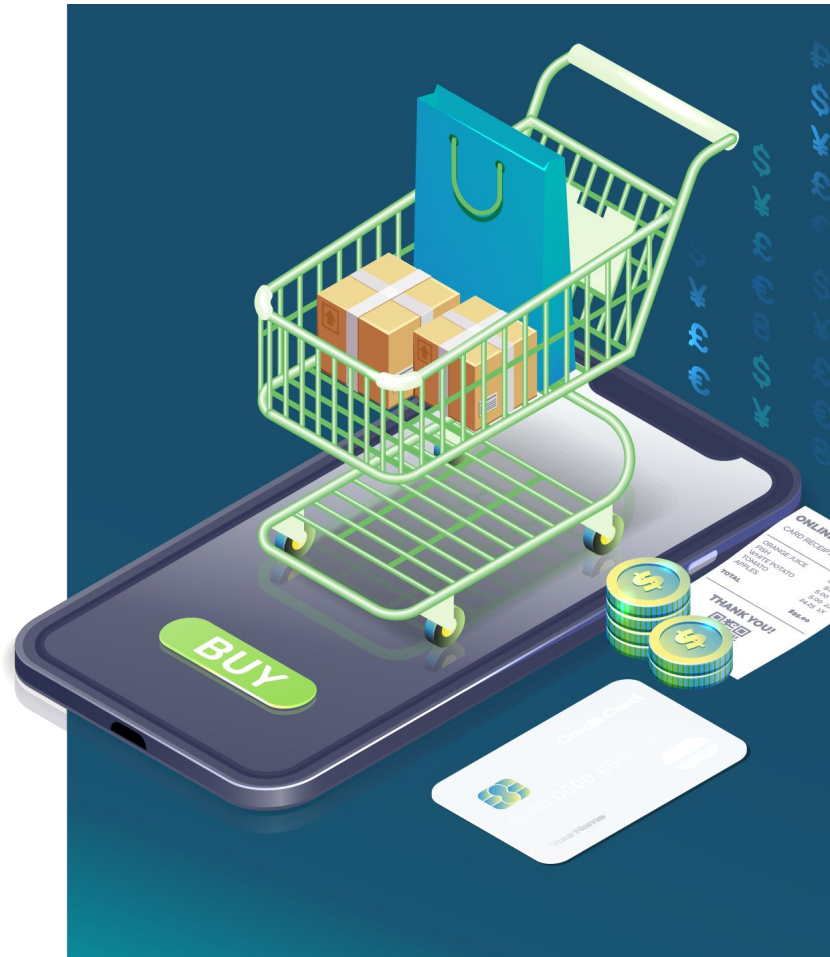

- Assemble on-the-fly and prioritize inventory with advanced Kitting & Bundling
- Track individual SKUs in kits, bundles, case packs, and lots
- Provide inventory certainty with dynamic locations to see the same item across multiple warehouses

Purchase Orders + Receiving

Transparency in the warehouse and in-transit

- ✔ Create Purchase Orders, then track and receive against them.
- ✔ Generate pre-sale income by selling against inventory in transit.
- ✔ Transfer seamlessly between internal, 3PL and FBA warehouses.
- ✔ Generate purchase orders from replenishment and reorder reports.

Reporting

The data and visibility to make better decisions.

Transaction History

Get insights into inventory movement within the warehouse with the ability to search by serial number and lots

Sold SKU

Breakdown of individual SKUs, ranging from sales channel, to assembled products

Sales Report

Shows your sales by any timeframe and sales channel

Replenishment Report

Avoid overselling and excess inventory, and directly integrate your POs. Perform Demand Planning to make better purchasing decisions.

And More...

Integrations

SkuVault is at the heart of your business.

Accurate inventory is synced to all your connected integrations.

Our open API and hundreds of existing integrations ensure that we can connect to whatever tech stack you have or want to create.

US-based Customer Growth Team

More than Support, SkuVault's Customer Growth delivers expert help and strategies for expansion.

And best of all, it's all included - never pay more for support.

-  Monday through Friday 7am to 7pm
-  Phone, Email and Ticket Support
-  Extensive User portal available 24/7

Shady Rays Customer Success Story

Since their start in 2012, Shady Rays has grown from disruptive startup to one of the greatest brands in retail.

[Watch Growth Story](#)

"We were coming from just using Quickbooks to manage inventory, so the ability to keep track of everything, print labels, send POs, view reports, etc. in one place has been great. Our productivity has definitely increased."

- Jonah Barker, Owner of Partsbuilt 3D
